

# THE ADVANTAGES OF GALILEOS

## PATIENT EVALUATION

Allows your Dentist to fully evaluate the present condition of your mouth, All on one screen. The powerful included tools help you with uncovering the true diagnosis that many times is missed on traditional 2-D imaging.

## TREATMENT PLANNING

Know before you go...

A full evaluation allows for streamline and efficient treatment. Minimize redundant treatment, minimize time to complete procedures. Maximize your chances of success when completing Endodontic treatment, Oral Surgery, Periodontal therapy and Implant dentistry

## INTEGRATION

The ability to seamlessly integrate with cad cam technology. Allowing your dentist to mimic what mother nature provided. Complex dentistry can disappear in a great smile of beautiful teeth. Galileos opens the door to transfer the way you chew into the design process. Completx dentistry that feels like it is part of you
